
Not Your Average Integrations

MyBernard's Web API and Standard File Layout make it easy to integrate with 3rd party data sources. This allows you to track all the various inbound and outbound activity of your donors providing you with a full 360 view of how they interact with your organization.

Built-In Integrations

As a client, your organization can easily integrate MyBernard with some products because they are already setup in the database.

Current Built-in Integrations	
MailChimp	Email
SWIFT Capture	Online forms (donations, e-mail signup, event registration, etc.)
WealthEngine	Wealth screening and demographic appends
Google Maps	Mapping via the MyBernard mobile web app
USPS	National Change of Address
TrustCommerce, Paperless & CyberSource	Payment Processors

Bernard is happy to consult with you to determine an approach that makes the data you want to capture within MyBernard available in a timely and effective manner
